"We believe in Quality"

About Us!

Work Science Digital Solutions (WSDS) is a start-up that believes in quality product deliveries to their clients. We are a professionally managed company that specialises in offering creating and accessible content using different technologies. Our focus is to deliver quality products that meets all the client requirements with accessibility standard guidelines.
Accessibility:

WSDS provides end-to-end accessibility services to ensure compliance with Section 508 and ADA guidelines. We offer PDFs, PPTs, HTML & WBT courses, e-Books, simulations, animations, SCORM packages, web applications, mobile applications, LMS, LCMS, and share VPAT reports with conformity to WCAG 2.1- Level A, AA and AAA guidelines.
Testing Services:

WSDS provides testing services. We test ILTs, HTML & WBT courses, e-Books, simulations, animations, web applications, mobile applications, LMS, LCMS, etc. to verify customer's functional and non-functional requirements and to ensure the product is not impacting any regional/cultural sentiment. We can share the bug report on JIRA, BugZilla, Mentis, or any specific bug reporting tool and in XLSX or document form (if required.)
Digital Engineering and e-Learning:

Using Digital Engineering, WSDS offers new applications that conceive and deliver the information using methodologies, utility, and process of creating new e-Learning products. Our team of experts, comprising content development, audio recording, video editing, animations 2D & 3D, Flash to HTML Conversion, SCORM courses development using Lectora 19 and Storyline.
Localization and Translation:

WSDS offers localization and translation services for e-learning courses, videos, apps, computer software, and lots more. At its core, translation transforms text, while localization, we transform videos, software, courses or entire product from one language to another with the adaptation of cultural sensitivity and handling technical issues.
Content Development:

WSDS creates researched content after understanding the client's requirements and perspectives to come up with innovative solutions for your business. We offer a wide range of content services under e-Learning solutions for K-12 and corporate training groups. Our content experts are ready to be at your service with customized solutions for educational and corporate training, like K-12 and higher-grade content, training modules, and technology courses, etc.
Creative Services:

WSDS offers creative solutions like prototyping, designing, animating, and videos for e-Learning, training modules, and brands. Based on the requirements our creative team serve creative and technical illustrations, infographics, animation, and videos that are accessible to all. Our designed content, interfaces, and videos are too engaging and interactivity for users.
Production Services:

WSDS offers creative solutions for Data entry, XML services, e-Books creation and conversion services. We offer our partners a qualitative data entry work on their LCMS. We take maximum care of the client's needs and create content on their LCMS and execute the service as per their demand and expectation. We offer XML conversion services that helps in passing data to and from different software, operating systems, and applications.

Software Development:

WSDS offers Mobile and Web products that enable clients to take their projects online. Our dedicated development team enables you to transform your ideas into live products, thereby fulfilling your complex application requirements by offering full stack custom software development services. A dedicated team of QA experts ensures that the testers work exclusively on a single project at a time and according to the needs and goals of the client. Our team can deliver customized portals, Games, Simulations, Mobile Apps, etc.
